

Print out and colour
in your own ladybird
finger puppet!

Just follow the
instructions below.

LADYBIRD

FINGER PUPPET

1 Colour in your ladybird. You can use any of the ones shown here as a guide, or make up your own design.

2 Fold it in half down the middle along the thin grey line, then cut it out around the outside dotted line.

3 Make two cuts along the dotted lines in the middle - this makes the strap for your finger.

4 Open out the ladybird and slip your finger through the strap so it becomes the spine of the ladybird.

5 Wiggle your finger up and down to make the wings flap and watch your ladybird fly!
